

BILAL IMRAN

AI Engineer | Python Developer | NLP & Generative AI Specialist

+92-314-950-7974 | acc.bilalimran@gmail.com | linkedin.com/in/bilalimran73ai | portfolio**bilalimran**.netlify.app | github.com/Bilal-73

PROFESSIONAL SUMMARY

Motivated AI Engineer and Python Developer with hands-on experience in Machine Learning, NLP, and Agentic AI systems. Skilled in developing intelligent solutions using LangChain, n8n, Flask, and React JS. Experienced in end-to-end model development, API integration, and AI chatbot creation. Passionate about Generative AI, automation, and building real-world applications that combine reasoning and intelligence. Published researcher with a CGPA of 3.88/4.0.

WORK EXPERIENCE

AI Engineer Intern | *Systems Limited*

Feb 2026 – Apr 2026

- Built and tested end-to-end NLP pipelines covering preprocessing, embeddings, and transformer-based workflows.
- Gained hands-on experience in LLM fine-tuning, prompt engineering, and model evaluation.
- Migrated an existing chatbot from Microsoft Bot Framework to Microsoft 365 Agents SDK.
- Conducted two technical training sessions on NLP fundamentals and practical implementation.

AI Engineer Intern | *Neuroticure NICAT*

Jul 2025 – Aug 2025

- Developed AI-powered emotional screening systems using ML models and conversational chatbots with Gemini API, Streamlit, and LangChain.
- Designed structured conversational workflows for ethical and real-time emotional analysis.

Tech Intern | *Forhopp*

Jul 2025 – Aug 2025

- Built and integrated AI-driven web applications using React.js, Flask, and Python in a production environment.
- Assisted in backend automation and frontend feature development.

AI Engineer | *Project-Based / Research-Oriented*

2024 – Present

- Designed and implemented AI systems across NLP, Computer Vision, and LLM-based applications.
- Built end-to-end ML pipelines including preprocessing, training, evaluation, and API deployment using Flask and FastAPI.
- Developed production-style solutions including resume screening, phishing detection, RAG chatbots, and YOLO-based object detection.

EDUCATION

BS Computer Science (Artificial Intelligence) — *PMAS Arid Agriculture University*

CGPA: 3.88 / 4.0 | 2026

FSc Pre-Engineering — *IMCB F-8/4*

92% | 2021

Matriculation — *Allied School*

86% | 2019

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL, HTML, CSS

AI / ML / Data: Machine Learning, Deep Learning, NLP, TensorFlow, PyTorch, scikit-learn, LangChain, Agentic AI, Generative AI, RAG, YOLO, Model Deployment

Frameworks: Flask, FastAPI, Streamlit, React JS, Bootstrap, n8n, Workflow Automation

Tools: Git, GitHub, VS Code, Postman, MySQL, Netlify, Azure

Soft Skills: Leadership, Communication, Team Collaboration, Problem Solving, Critical Thinking, Adaptability, Research

PROJECTS

AI Resume Classification & Job Matching System ([GitHub](#))

NLP-based system for resume parsing, skill extraction, and intelligent candidate-job matching.

Phishing, Spam & Ham Email Detection System ([GitHub](#))

Multi-class NLP classification model trained on real-world datasets for phishing and spam detection.

Multi-Language Neural Machine Translator ([GitHub](#))

Multilingual text translation system leveraging deep learning-based translation APIs.

AI-Based Emotional Screening Chatbot (Neuroticure – NICAT)

Conversational AI chatbot for emotional and mental state assessment using Gemini API, LangChain, and Streamlit.

Neuro-Symbolic Visual Question Answering (FYP)

Explainable vision-language system combining computer vision, NLP, and symbolic reasoning for assistive AI.

Clinify – Healthcare Appointment Automation Dashboard

Automated healthcare appointment management system built with n8n workflow automation.

PUBLICATIONS & RESEARCH

Knowledge-Guided Neuro-Symbolic Visual Question Answering for Assistive Systems for the Visually Impaired

Under Review / Accepted — 1st International Conference on AI and Multidisciplinary Innovations (ICAMI-2026). Integrates computer vision, NLP, and symbolic reasoning to develop explainable assistive AI systems.

CERTIFICATIONS

Designing Agentic Systems with LangChain — <i>DataCamp</i>	2026
Fine-Tuning with Llama 3 — <i>DataCamp</i>	2026
Microsoft Azure Fundamentals (AZ-900) — <i>DataCamp</i>	2026
